Subject: January 2004 Issue of DEA Microgram Bulletin has been Posted

[Microgram e-net mass mailing]

Greetings to All. This message is to notify you that the January 2004 issue of Microgram Bulletin has been posted at the following URL:

<http://www.dea.gov/programs/forensicsci/microgram/index.html>

Click on "Microgram Bulletins" to view the document (.pdf and .html versions both provided).

Please promptly post this notice on your organization's intranet. In almost every case, you are the ONLY contact in your organization who is receiving this notice!

Note that I am continuously receiving requests for Microgram subscriptions from individuals in offices that are already receiving these notifications, indicating that the current contact person is not forwarding the notices, nor printing off and circulating a hard copy. If you are unable or unwilling to forward the e-notices, or print and circulate hard copies, PLEASE recruit a new contact person for your office, and forward that person's name and email address to me at your earliest convenience. Thank you.

Standard Information Follows:

All issues of Microgram Bulletin starting from January 2003, and the inaugural issue of Microgram Journal

(January - June 2003) are posted at the same URL (click on the appropriate link).

Important!: If you click on the page and do NOT see the most recent issue, then your computer is probably reloading an older version of the webpage from your webpage cache. In such cases, click on "Refresh" or "Reload" in order to get the most current page.

Important!: If your ISP or organization is using anti-spamming filters, you will need to "whitelist" the `microgram_editor@mailsnare.net` address - otherwise, you will not receive these notices. Note that email addresses that return rejection notices for three consecutive mass mailings are assumed to be bad, and will be deleted from the database. It is your responsibility to provide a valid email address, and to ensure that the `microgram_editor@mailsnare.net` address is "whitelisted" if your organization has filters installed. If you stop receiving these notices, you may assume that your organization's ISP is returning rejection notices to the Microgram mailsnare account.

To change your email address, change to a different recipient, or terminate your organization's subscription, please send a reply email to that effect, including your organization's full name and full surface mailing address.

Each issue of the Bulletin and Journal is posted in two formats. The first posting is in .pdf format, and exactly matches the printed, hard copy version. If you wish to maintain a hard copy library of Microgram Bulletin or Journal, or wish to circulate hard copies to your staff (necessary if they do not have access to the Internet themselves), then you should select this option. Note that you must have Adobe Acrobat Reader on your Desktop in order to download and print .pdf formatted files; also note that .pdf formatted versions are quite sizeable files, and will take some time to download, especially using dialup modems. If you do not have Adobe Acrobat Reader on your computer, you may download it at no charge from the Adobe website (<http://www.adobe.com>). Although Microgram Bulletins and Journals are provided in color, you may print them off using either a color or a standard black and white printer. If you wish to maintain a hard copy library of Microgram Bulletins or Journals that mimics the printed version, you should use a high quality color printer, select the two-sided copying option, and use higher quality, thicker, and preferably acid-free (archive quality) paper.

The second posting is in .html format. It does not match the printed, hard copy version, and each page may be horizontally clipped, vertically truncated, or both, if you attempt to print it. However, it is 508 (American with Disabilities Act) compliant, can be searched by standard web search techniques, will load faster, and will have slightly sharper and brighter text and images, versus the .pdf version. In addition, the .html version allows for easier electronic copying of text and/or images, should you have any need to do so.

Please note that the Office of Forensic Sciences is always interested in adding new law enforcement organizations to the Microgram subscription list. If you are aware of any law enforcement organization, and especially any forensic or crime laboratory, that is NOT receiving Microgram Bulletin or Microgram Journal, please forward their name, mailing address, and the email address of the Office Head to the Microgram Editor via reply email, and they will be added to the subscription list. Similarly, you may feel free to forward the email notifications to anyone you deem appropriate.

- Dr. Bob Klein, Microgram Editor
